↑ ABOUT LYSOCIL

For the LYSOCIL Twinning project, the Chronic Diseases Research Center (CEDOC), from NOVA Medical School (NMS) Universidade NOVA de Lisboa (UNL), partnered up with two internationally-leading institutions, Münster University (WWU) and the Telethon Institute of Genetics and Medicine (TIGEM), to help strengthen the research and innovation capacity and aiming to:

- Intensify intramural collaboration;
- Strengthen the research quality and innovation, while promoting multidisciplinary projects;
- Provide an exciting research environment for the training of young researchers, and raise the research and academic profile of CEDOC;
- Foster the organization of outreach activities at local and national levels.

LYSOCIL is a Twinning project led by NMS that aims to strengthen the research and innovation capacity of CEDOC, helping it to become a national and internationally-recognized centre of excellence in chronic rare diseases research and innovation.
